### **Introduction**

The 528th Sustainment Brigade, Special Operations (Airborne), is responsible for providing logistical, medical and signal support for Army Special Operations Forces (ARSOF) worldwide in support of contingency missions and war-fighting commanders.

In October 2001, 150 Soldiers of the then-Special Operations Support Command (Airborne), were among the first deployed in support of Operation Enduring Freedom. Since that time the unit's Soldiers, known as "Sentinels," have been continuously deployed in support of overseas contingency operations much like their U.S. Army Special Operations Command comrades in arms around the globe. The Sustainment Brigade's support provides unrivaled value to Special Operations Forces in defense of the nation.

The brigade has transformed from a unit that does not typically deploy to one constantly rotating into operations providing Special Operations Forces with the material and equipment they need to win the fight. On a typical day, about 35 percent to 40 percent of the brigade's nearly 800 Soldiers are deployed in small teams of two to eight Soldiers in support of SOF.

### **Organization**

Headquartered at Fort Bragg, N.C., the 528th Sustainment Brigade (Special Operations) (Airborne) establishes operational level logistics conditions to enable Army Special Operation Forces (ARSOF) operations worldwide, using three ARSOF Support Operations Teams (ASPOs), three Special Operations Resuscitation Teams (SORT), six ARSOF Liaison Elements (ALE), three Medical Level II teams and the 112th Special Operations Signal Battalion (Airborne). Together, the units of the brigade, ensure that U.S. Army Special Operations Forces are equipped to perform their missions.

The brigade has the capability of providing technical control to multiple Special Forces Group Support Battalions in the planning and execution of ARSOF combat service support and combat health support. The brigade is capable of deploying three Army Support Operations Teams in support of ARSOF-based Special Operations Task Forces or a SOF-based JTF.

The Support Operations Team initially co-locates with the Group Support Battalion or a Ranger support operations detachment and provides ARSOF with an in-theater presence providing centralized and integrated material management of property, equipment maintenance, logistical automation and repair parts and supplies.

ARSOF Liaison Elements Soldiers are embedded in Army regional theaters' staff. They plan and coordinate with Theater Army, Special Operations Command and Army Special Operations Command to ensure support during operations and training. As a Theater Army staff member, these officers and non-commissioned officers' knowledge of theater-specific requirements and capabilities assist units in coordination with the theater.

The medical section provides Level II medical support as a USASOC asset managed by the brigade surgeon and constitutes the nucleus of the capability of receiving a conventional Army Forward Surgical Team. The medical section is robust enough to provide combat health support on an area basis for approximately 450 personnel.

The support includes unit-level medical support and health services, logistics, emergency medical and resuscitative treatment for all classes of patients; emergency dental treatment, and preventive medicine support, while maintaining Standard Army Management Information Systems and providing veterinary support.

Members of the 112th Special Operations Signal Battalion specialize in communication and force sustainment skills. They employ innovative telecommunications technologies providing Army Special Operations Task Force commanders with secure and non-secure voice, data and video services. In their respective fields, signal and support Soldiers provide oversight of material distribution management, synchronization and integrated material management of property accountability, maintenance management and logistics automation for deployed ARSOF.

Communications expertise allows ARSOF to “shoot, move and communicate” on a continuous basis. Soldiers assigned to ARSOF units are taught to operate and maintain a vast array of unique equipment not normally used by their conventional counterparts. To meet the needs of ARSOF, the Sustainment Brigade (A) has developed logistical and signal packages that are rapidly deployable on short notice. Soldiers assigned to these units are airborne qualified.

The 528th embodies its motto of “We Support to the Utmost,” providing the means to effectively and efficiently execute logistics in support of ARSOF operations.
