

# DATA AGGREGATOR OPT-OUT

- **Do** conduct research on what records data aggregators have collected about you.
- **Do** research on information that data aggregators have about your family under multiple listings; you may need to repeat the removal process described below for each listing.
- **Do** follow ALL necessary steps to complete the removal process; you may need to mail or fax information to the aggregator.
- **Do** understand that incorrect information may be a good thing and that it might not be necessary to “fix.”
- **Don't** think removing your information from data aggregators will suppress everything. Information about family members may still contain information about you.
- **Don't** think you have to delete all your information on these sites. Some information on data aggregator sites is normal.
- **Don't** remove information on other family members. If there is information that you believe is harmful to you, contact your family member and help them to go through the removal process.

## Individual Data Aggregator Removal Links

### Opt out of display on Google Local and other Google properties

You can opt out of having content that Google has crawled from your site displayed on various Google properties:

- Google Shopping
- Google Flights
- Google Hotels and vacation rentals
- Google Local (specialized search results pages that trigger in response to a local query)

If you choose the opt-out option, content from your site that has been crawled by Googlebot will not be displayed on any of the properties listed above. Content currently being displayed on any of these properties will be removed within 30 days of opting out.

The opt-out option applies on a domain name basis. For instance, you may designate `example.com` to subject all content on that domain name to the opt out. If you own additional domains (like `example.org` or `example2.com`), including domains that may serve content to an opted out domain, you must opt them out separately for the opt-out to apply to the content on each of those separate domains. You may not designate only individual sub-domains (such as `sub.example.com`) or individual directories within a domain (such as `example.com/sub`).

Note that for Google Local, this opt-out option applies globally. For the remaining covered properties, this opt-out option applies only to services hosted on the `google.com` domain.
