

REDDIT

- **Do** use caution when posting images and videos of you or your family. Be aware of your surroundings, to include identifiable locations and any other personal security vulnerabilities.
- **Do** remember there are privacy concerns when using your email or connecting other accounts when registering for free services, such as apps and social media.
- **Do** change your password periodically and turn on Two-Factor Authentication to help keep your account secure.

- **Don't** post anything in Reddit that you wouldn't want seen by the general public.
- **Don't** establish connections with people or communities you do not know or trust. Understand that people are not always who they say they are online.
- **Don't** forget to remind family members to take similar precautions with their accounts. Their privacy and share settings can expose your personal data.

Account Settings

Once at your Reddit Homepage, at the top-right, you can click a dropdown box as highlighted in red to the left. Once there you can go to "User Settings" which will bring you to your "Account." Once here you can edit your email address, or your Apple and Google account if you signed up using those. You can also "Deactivate" your account from this page.

Reddit is an American social news aggregation, web content rating, and discussion website. Registered members submit content to the site such as links, text posts, images, and videos, which are then voted up or down by other members. Posts are organized by subject into user-created boards called "communities" or "subreddits," which cover topics such as news, politics, religion, science, movies, video games, music, books, sports, fitness, cooking, pets, and image-sharing.

Customize Profile

Here, you can edit personal information that is displayed to the public when using your Reddit account. Such as your “Display name” and “About,” can be edited. It's recommended you don't put anything overtly personal in these sections. You're also able to adjust if your account is an “NSFW” account, depending on the type of content you post.

Safety & Privacy

After navigating to “Safety & Privacy,” you can edit “Collapse potentially disruptive comments.” It's recommended that this is set to “High.” You can also adjust your privacy, and turn off ads, location and activity. It's recommended that you turn on “two-factor authentication.”

PROFILE CATEGORY

NSFW
 This content is NSFW (may contain nudity, pornography, profanity or inappropriate content for those under 18)
 ☐

ADVANCED

Allow people to follow you
 Followers will be notified about posts you make to your profile and see them in their home feed.
 ☐

Content visibility
 Posts to this profile can appear in [r/all](#) and your profile can be discovered in [/users](#)
☐

Active in communities visibility
 Show which communities I am active in on my profile.
 ☐

Safety & Privacy

Manage how we use data to personalize your Reddit experience, and control how other redditors interact with you. To learn more, visit our [Privacy & Security FAQs](#).

SAFETY

People You've Blocked
 Blocked people can't send you chat requests or private messages.

BLOCK NEW USER

ADD

Collapse potentially disruptive comments
 Automatically collapse comments that are potentially rude or disrespectful by selecting the sensitivity level you're most comfortable with—selecting Low will collapse the least, High will collapse the most.

HIGH

PRIVACY

Show up in search results
 Allow search engines like Google to link to your profile in their search results.
 ☐

Personalize all of Reddit based on the outbound links you click on
 Allow us to use the links to other sites you click on for operational purposes (that help us better understand how you and others use Reddit) and to show you better ads and recommendations.
 ☐

Personalize ads based on information from our partners
 Allow us to use information that our advertising partners send us to show you better ads.
 ☐

Personalize ads based on your activity with our partners
 Allow us to use your interactions with sites and apps we partner with to show you better ads.
 ☐

Personalize recommendations based on your general location
 Allow us to use your city, state, or country (based on your IP) to recommend better posts and communities.
 ☐

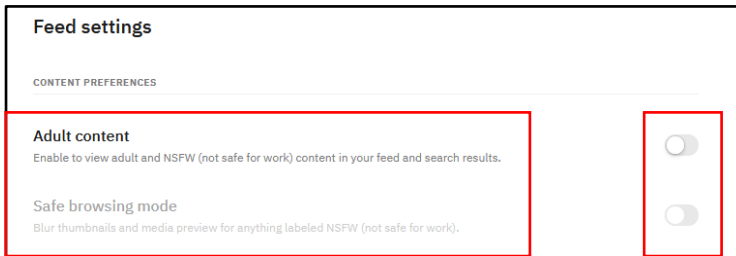

Personalize recommendations based on your activity with our partners
 Allow us to use your interactions with sites and apps we partner with to recommend better posts and communities.
 ☐

ADVANCED SECURITY

Use two-factor authentication
 Help protect your account (even if someone gets your password) by requiring a verification code and a password to log in.

Feed Settings

Here you can enable/disable “Adult Content.” If you choose to leave it enabled, it’s recommended that you turn on “Safe browsing mode,” that way the content is blurred before you open it.

Chat & Messaging

Under “Chat & Messaging,” you can control “Who can send you chat requests” and “Who can send you private messages.” It’s recommended that you set this to “Nobody,” as you can always add users to “Approved Users” or “Invite someone to chat” using a link.

Phone Settings

As annotated by numbers 1 – 4 to the left, shows how to access your settings via mobile phone (Apple/Android). Here you can control the same settings as you would via the PC version by scrolling down once you reach number 4.
