# **REDDIT**

• <u>Do</u> use caution when posting images and videos of you or your family. Be aware of your surroundings, to include identifiable locations and any other personal security vulnerabilities.

• <u>Do</u> remember there are privacy concerns when using your email or connecting other accounts when registering for free services, such as apps and social media.

• <u>Do</u> change your password periodically and turn on Two-Factor Authentication to help keep your account secure. • **Don't** post anything in Reddit that you wouldn't want seen by the general public.

• **Don't** establish connections with people or communities you do not know or trust. Understand that people are not always who they say they are online.

• <u>Don't</u> forget to remind family members to take similar precautions with their accounts. Their privacy and share settings can expose your personal data.

Reddit is an American social news aggregation, web content rating, and discussion website. Registered members submit content to the site such as links, text posts, images, and videos, which are then voted up or down by other members. Posts are organized by subject into usercreated boards called "communities" or "subreddits," which cover topics such as news, politics, religion, science, movies, video games, music, books, sports, fitness, cooking, pets, and imagesharing.

# **REDDIT**

### **Customize Profile**

Here, you can edit personal information that is displayed to the public when using your Reddit account. Such as your "Display name" and "About," can be edited. It's recommended you don't put anything overtly personal in these sections. You're also able to adjust if your account is an "NSFW" account, depending on the type of content you post.

#### Safety & Privacy

After navigating to "Safety & Privacy," you can edit "Collapse potentially disruptive comments." It's recommended that this is set to "High." You can also adjust your privacy, and turn off ads, location and activity. It's recommended that you turn all of these off. It's recommended that you turn on "two-factor authentication."

## **Feed Settings** Feed settings CONTENT PREFERENCES Adult content Enable to view adult and NSFW (not safe for work) content in your feed and search results. Safe browsing mode

#### Chat & Messaging

Under "Chat & Messaging," you can control "Who can send you chat requests" and "Who can send you private messages." It's recommended that you set this to "Nobody," as you can always add users to "Approved Users" or "Invite someone to chat" using a link.

Here you can enable/disable "Adult Content." If you choose to leave it enabled, it's recommended that you turn on "Safe browsing mode," that way the content is blurred before you open it.
