

TINDER

Tinder does not have many privacy settings. Under the “App Settings” menu, you can decide if you would like to receive notifications for “new matches”, “messages”, “moment likes”, and “in-app vibrations”.

Tinder

In the “Discovery Settings” menu, you can decide if you would like to be in “discovery” mod, which will allow other people to find you on Tinder. It also allows you to set preferences for people that can view your profile, such as distance, age, and gender.
